

2 MODULE

DESCRIBE THE SANITATION SYSTEM

-continuation-

SANITATION
SAFETY
PLANNING

Welcome back from our field visit

SSP Modules

STEP 2.5

Confirm the system description

OBJECTIVE

- To ensure that the system description is complete and accurate.

-
- Previous steps probably largely a **desk exercise**.
 - There is a need to check through field investigations to ensure that the **information is complete and accurate**.
 - **Tools:** sanitary surveillance, transect walks, focus group tools etc.
 - **Validate** claimed treatment efficiency by references, testing programmers etc.
 - **Map, system description and waste fraction characterization need to be updated after validation.**

GROUP WORK

Applying Step 2.5 to our Alwar case study

Based on all we have seen and learnt this morning, in your groups check all the assumptions:

- revise the system map
- check if the flows descriptions are ok
- check the exposure groups
- check if we have any epidemiologic information Identify the exposure groups.
